

# GO GREEN

## WHAT IS SUSTAINABLE FASHION?

Sustainable fashion refers to a clothing supply chain that is ecologically and socially responsible. It aims to reorient the industry and consumers away from the fast fashion model and toward sustainable practices in sourcing, production, distribution, marketing, and consumption.

“Buy less, choose well, make it last.”

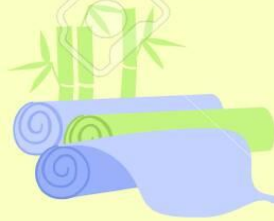

Fast fashion has completely revolutionized the apparel industry, but not for the better. Behind every piece of clothing in a store, there is an industry stripping the Earth of its limited resources and exploiting the labor force that works in its garment factories. Tremendous waste characterizes this industry as it depletes healthy soil, contaminates fresh water sources, pollutes the air we breathe, defiles our oceans, destroys forests and damages ecosystems and the health of their biodiversity.

# ECO-FRIENDLY FASHION

**ORGANIC COTTON CULTIVATION**

**FABRICS FROM EASILY RENEWABLE CROPS (HEMP, BAMBOO, NETTLE)**

**USED RECYCLED AND STABLE UPPER AND RECYCLED WOODEN SOLES OR MADE FROM RECYCLED RUBBER RESIN**

**NATURAL DYES FROM PLANTS**

**JEANS MADE OF REPURPOSED DENIM**

**SUNGLASS FRAMES MADE OF RECYCLED POST CONSUMER WASTE**

Slim wallet from Green Banana Paper, made from 100% pure banana fibre paper. The banana fibre paper is water & tear resistant and has been treated with a wax layer in order to increase its durability.

Each wallet has 6 card slots, 2 compartment on both sides for cash and folded bills, and 1 zip pocket for coins

# Banana FIBRE WALLET

## NATURAL

### Green Banana Paper

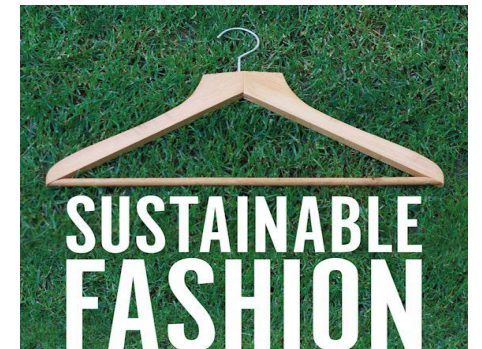

GREEN BANANA PAPER is sustainably manufacturing vegan products from agricultural banana waste in Kosrae, Micronesia. All products feature banana fibre paper, a naturally beautiful and strong plant-based material. In their paper making process the fibres fuse together on a microscopic level to create a 'leather-like' paper material that is lightweight, tear-resistant, and biodegradable. GREEN BANANA PAPER are supporting over 100 farmers on Kosrae who now earn an extra income from banana trees that would otherwise be waste.

Vegan purse made from dried teak leaves. Compared to other faux leather products which are made entirely from synthetic materials, the wallets from Ecomonkey consist of at least 80% teak leaves and therefore considerably reduce the amount of plastic needed for each product. The wallets are entirely vegan, durable and water-repellant. The material is made from fallen down teak leaves which are carefully collected by hand. Each wallet is produced under fair working conditions which also ensure minimum wage

Each of the 54 parts that make up the shoes have been considered for their impact on the climate and biodiversity, with the materials used being 88.7% plant-based. The uppers are Pinatex, an innovative alternative to leather that is made using discarded pineapple leaves, a by-product from the food industry. Waste coconut husk fibres are used for internal components such as reinforcements and the footbed, where it is combined with a cork top. These materials have durability, breathability and elasticity that provide long-lasting support and comfort. The brand focused on sourcing sustainable materials that would enhance, rather than compromise the aesthetics of the shoes
